

Design Technology

January 2018 – Reception

We had Design Technology Week from 29th January. Classes 1 and 2 worked extremely hard on a problem they had to solve. The Three Billy Goats Gruff's bridge had been destroyed because of all the terrible weather and it had rotted away. They had to design and create a new way for the Billy Goats Gruff to get across the river. Here are some of the children's impressive ideas...

Classes 1 and 2 enjoyed exploring different types of materials to create their design for Billy Goat's Gruff.

We were so proud of the Reception children that we decided to share their models in assembly. Everyone thought their ideas were fabulous!

We designed and created lots of different ideas to get across the river like; springy shoes, submarines, trampolines, stepping stones and many more imaginative ideas.

I thought the children's ideas were out of this world.
Trystan - Class 5
